

Short Talks: July 27, 17.10-18.30

Name	Affiliation	Tentative title of short talk
Tomoya Hayata	Keio University	Hamiltonian lattice Yang-Mills theory based on spinfoams
Tetsuo Matsui	Kindai Univ. and Matsuri Science Academy	Truncated Wigner Approximation of $s=1/2$ Spins and Beyond
Tokiro Numasawa	University of Tokyo	Quantum gravity, quantum information, and condensed matter physics
Shuhei Ohyama	YITP	The higher Berry phase and the triple inner product
Taishi Sano	Waseda University	Self-Introduction, the student interested in LQG
